

Anna Mohr-Almeida
SRP candidate, Board of Directors, District 9

Press Statement 4.1.2024

My name is Anna Rose Mohr-Almeida, and I am running for District 9 Seat of the Salt River Project Board of Directors.

In 2015, SRP held a rate case hearing and voted to hinder the wide-spread adoption of rooftop solar in SRP territory. I testified at that hearing and my pleas for the acceleration of renewable energy were ignored, which I found incredibly aggravating and dismissive.

Today, I am running for the board of directors because I believe that holding this seat is my best opportunity to help Arizona become a renewable energy leader in the United States. SRP should be a solar energy generation leader because we live in a state with more than 300 days of sunshine per year.

SRP positioning itself as a renewable energy leader is important because I would like to enjoy a habitable planet and share this with future generations. The prospect of not having a livable planet has riddled my generation with climate anxiety.

We need to be good stewards of our planet and transition to 100% carbon free resources to generate our electricity and deliver water here in the Valley of the Sun! I speak for and represent the generation that is and the generations to come. We want renewable, sustainable energy that is accessible to everyone so that we too can thrive and enjoy the amazing biodiversity inherent to our planet.
